

# PRAKASH POTNURU

[Gmail](#) | [GitHub](#) | [LinkedIn](#)

## PROFESSIONAL SUMMARY

Computer Science Engineering undergraduate with a strong interest in Software Testing and Quality Assurance. Skilled in Python, Java, SQL, web technologies, debugging, and identifying software issues. Familiar with the Software Development Life Cycle (SDLC), Software Testing Life Cycle (STLC), manual testing concepts, and Agile development. Detail-oriented, analytical, and eager to contribute to building reliable, high-quality software.

## EDUCATION

|                                                                                           |                    |
|-------------------------------------------------------------------------------------------|--------------------|
| <b>Bachelor of Technology - CSE (Cybersecurity, IoT, Blockchain)</b>                      | <b>2024 - 2027</b> |
| <i>Maharaja Vijayaram Gajapathi Raj College of Engineering (MVGRCE), Vizianagaram, AP</i> |                    |
| <b>Diploma - Computer Engineering</b>                                                     | <b>2021 - 2024</b> |
| <i>Sai Ganapathi Polytechnic</i>                                                          |                    |

## SKILLS

|                            |                                                                                                     |
|----------------------------|-----------------------------------------------------------------------------------------------------|
| <b>Programming:</b>        | Java, Python, C, C++                                                                                |
| <b>Web Technologies:</b>   | HTML, CSS, JavaScript, Bootstrap                                                                    |
| <b>Database:</b>           | MySQL, SQL                                                                                          |
| <b>Software Testing:</b>   | Manual Testing, Test Case Design, Functional Testing, Regression Testing, Bug Reporting, SDLC, STLC |
| <b>Backend &amp; APIs:</b> | Django, REST API Basics                                                                             |
| <b>Tools:</b>              | Git, GitHub, VS Code                                                                                |
| <b>Methodologies:</b>      | Agile, Scrum Basics                                                                                 |

| <ul style="list-style-type: none"><li>Developed Django-based applications and validated functionality during the implementation of CRUD operations.</li><li>Applied Object-Oriented Programming (OOP) concepts for efficient software design and problem-solving.</li><li>Continuously learned and applied new programming concepts to bridge theoretical gaps and debug software issues.</li></ul> |                    |

## PROJECTS

|                                                                                                                            |                                   |
|----------------------------------------------------------------------------------------------------------------------------|-----------------------------------|
| <b>Self-Healing SRE Agent</b>                                                                                              | <a href="#">GitHub Repository</a> |
| <ul style="list-style-type: none"><li>Automated monitoring and recovery system to reduce downtime using scripts.</li></ul> |                                   |

- Tested system behavior using simulated failure scenarios and validated anomaly detection and recovery workflows.

## **Library Management System**

[Live Demo](#) | [GitHub Repository](#)

- Web-based system for managing books and users.
- Tested CRUD functionality and validated user workflows to identify and resolve application issues.
